

General Aptitude Questions (20) | Common for Commerce and Arts

Welcome! This assessment is designed to help us understand *you* better how you think, how you work, what motivates you, and how you approach challenges and decisions. There are no right or wrong answers. Please respond honestly and choose the option that most closely reflects how you would actually behave not how you think you *should* behave. Your responses will help us suggest career and specialization pathways that genuinely suit who you are. This should take around 12–15 minutes. Take your time, read each situation carefully, answer honestly, and enjoy the process.

SECTION 1: APTITUDE & REASONING

Q1. You're solving a problem and realise mid-way that two different methods could both lead to a valid answer. What do you most likely do?

- A) Stick with the method I started by switching halfway is more confusing than helpful
- B) Quickly try the second method to see if it's faster, then decide which to use
- C) Work through both methods to compare which gives a cleaner or more efficient result
- D) Step back and analyse which approach is more suitable before committing to either

Q2. You've completed an assignment ahead of time and notice a related concept that wasn't part of the task, but it seems genuinely interesting. What do you do?

- A) Move on, I've done what was asked and that's enough
- B) Bookmark it to explore if I ever have extra time
- C) Spend a few minutes reading more about it out of curiosity
- D) Explore it further to see whether it adds anything useful to your thinking or work

Q3. Your teacher gives you an open-ended research task with very little guidance on how to structure it. What do you most likely do?

- A) Wait to see how classmates are approaching it before starting
- B) Follow the most familiar structure you've used in past assignments
- C) Think about what the task is asking and design an approach that makes logical sense
- D) Research different methodologies and structures before deciding how to organise your work

Q4. You're choosing between two subject electives. One is harder but opens more career doors. The other is more comfortable but limits your options later. How do you decide?

- A) Choose the comfortable one, performing well matters more than keeping future options open
- B) Ask family or friends what they'd recommend and use their input as my main guide
- C) Research both paths and think about where I want to be a few years from now
- D) Build a side-by-side comparison: weighing difficulty, outcomes, and personal fit, before deciding

SECTION 2: ACADEMIC READINESS

Q5. You have an important assignment due in two weeks. Nobody is checking your progress. What are you most likely to do?

- A) Wait until the deadline gets closer, I work better under pressure
- B) Work on it occasionally when I feel motivated or remember to
- C) Create a rough plan and make steady progress over the two weeks
- D) Break it into smaller milestones and follow a structured schedule from day one

Q6. In class, your teacher introduces a concept that most students, including you, find confusing. What do you typically do?

- A) Take notes and trust it will become clearer closer to the exam
- B) Ask a classmate to explain it to me after class

C) Ask the teacher a question during or right after class to clarify my understanding

D) Revisit the concept independently, using textbooks or other resources, until it fully makes sense

Q7. When preparing for an important exam, which of the following best describes how you study?

A) I focus on memorising key points, formulas, and common answer formats

B) I review my notes and attempt past papers to get comfortable with the format

C) I make sure I understand the underlying concepts, not just the expected answers

D) I test my understanding from multiple angles to confirm I can apply concepts to unfamiliar situations

Q8. You receive a significantly lower mark than expected on a test you thought you'd prepared well for. What is your most likely reaction?

A) Feel discouraged, an unexpected result like this knocks my confidence for a while

B) Accept it and move on without spending too much time analysing it

C) Go through the paper carefully to identify where I lost marks and adjust my preparation

D) Treat it as a diagnostic, analyse every mistake in detail and rethink my approach to this subject

SECTION 3: COMMITMENT & PERSISTENCE

Q9. You've worked hard to get into a competitive programme or selection process, and you don't make it through on your first attempt. What do you do?

A) Take it as a sign that this path may not be the right fit and consider alternatives

B) Take time to recover, then decide later whether to try again

C) Identify what held me back and prepare more seriously for the next opportunity

D) Start planning my next attempt almost immediately, a setback like this only sharpens my focus

Q10. Midway through a course you chose, you find it harder and less enjoyable than you expected. What are you most likely to do?

A) Begin exploring alternatives, there's no point continuing something that isn't working

B) Keep going for now but stay open to switching if something better comes along

C) Speak to a mentor or counsellor to understand whether this is a temporary phase or a genuine mismatch

D) Stay fully committed, I chose this pathway for reasons that still hold, and I trust the process

Q11. A classmate who started at the same level as you is now noticeably ahead in a subject you both care about. How do you respond?

A) Accept it, some people are just more naturally suited to certain subjects

B) Feel a burst of motivation initially, but gradually return to my usual pace

C) Ask them how they're studying and try to apply similar habits

D) Use it as a challenge, seeing someone ahead of me pushes me to raise my own standard

Q12. You come across a free or affordable short course that would build a skill relevant to your career interests, but it requires consistent effort over six weeks. How likely are you to follow through?

A) Unlikely, six weeks of extra effort on top of regular schoolwork is a lot to take on

B) I'd start it but may not complete it if other priorities take over

C) I'd make a genuine effort to complete it, six weeks is manageable if I stay organised

D) I'd complete it and actively look for the next skill-building opportunity while doing so

SECTION 4: FINANCIAL READINESS

Q13. You're seriously considering a particular career pathway. Which best describes how you think about the financial dimensions of that choice?

- A) I focus on whether the career interests me, the financial details can be sorted out later
- B) I have a general sense that some careers cost more to enter than others
- C) I try to understand the typical costs involved and what someone in that field usually earns over time
- D) I research both the investment required and realistic earning potential before committing to a direction

Q14. You discover that a course or programme you're interested in offers a merit-based scholarship or funding option. What do you most likely do?

- A) Assume I'm unlikely to qualify and don't look into it further
- B) Note it as a possibility but don't actively research the eligibility criteria
- C) Look up the requirements to understand whether it's worth pursuing
- D) Research the scholarship thoroughly, understand exactly what's needed, and prepare the strongest possible application if eligible

Q15. Two career paths interest you equally. Path A has lower upfront costs and lets you start earning sooner. Path B requires a larger educational investment but offers stronger long-term growth potential. How do you approach this choice?

- A) Go with Path A, lower risk and earlier income is the more sensible choice
- B) Go with Path B, greater long-term potential is almost always worth the investment
- C) Research both paths more carefully, I need more concrete information before deciding
- D) Compare the total investment against realistic long-term outcomes for both paths before making a call

Q16. You've identified a career pathway that excites you, and you learn it involves significant associated costs, education, preparation, and related expenses over several years. What is your approach?

- A) Feel discouraged if the costs seem difficult to manage given my current situation
- B) Focus on the career itself for now and hope the financial side works itself out
- C) Start researching available scholarships, funding options, and alternative support pathways
- D) Map out the likely costs, explore every available funding avenue, and build a realistic plan for pursuing it

SECTION 5: SOFT SKILLS, WORK STYLE & CAREER ORIENTATION

Q17. You're part of a group project and one team member isn't contributing equally. The deadline is approaching. What do you most likely do?

- A) Quietly cover their share of the work to make sure the project gets done on time
- B) Raise it with the group and suggest redistributing the responsibilities more fairly
- C) Speak to the team member privately first to understand what's going on before escalating
- D) Flag it to the teacher or project supervisor so the issue is formally on record

Q18. Your class is presenting a group project and nobody volunteers to present. What do you most likely do?

- A) Stay quiet and wait for someone else to step forward
- B) Suggest the most confident speaker in the group should take the lead
- C) Offer to co-present with someone so the responsibility is shared
- D) Volunteer to lead the presentation

Q19. You're asked to describe your ideal working life ten years from now. Which comes closest to how you actually think about it?

- A) A stable, well-paying job with a healthy work-life balance

B) A senior role in my chosen field with strong financial rewards

C) Work that I find genuinely meaningful and that contributes to something larger than myself

D) Something I've built or led, a venture, a body of research, or a career path I've shaped on my own terms

Q20. You've built a clear career plan, and then you come across a new and emerging field that genuinely excites you, one that wasn't on your radar when you started planning. What do you do?

A) Stay the course, I've already committed to a direction and changing it feels risky

B) Keep the new field in mind as something to revisit later, but don't change direction now

C) Research the new field seriously alongside your current path before making any decisions

D) Actively explore it, staying open to emerging opportunities is part of smart career planning
